

# Lab Certified Quiz

1.) Label the components of the NXT and their purpose

2.) If the motor is oriented like in the picture, which way will it move if you programmed it to go "FORWARD"? (Have tester point in which direction)

3.) What are the names of the wires pictured?

4.) What is the purpose of each button pictured?

5.) Match the Key Command with the purpose. Point out which ones match for your instructor.
